Welcome Everyone!!

Email Scripting in Python

TCS Windows VMware

Problem Statement 01

- Suppose, Vishnu is having his birthday today and as a gift he wants us to wish him on email without using Outlook (directly).

Problem Statement 02

- Now, Keerthi came and said, I am also having my B'day today. Wish me as well :)

Problem Statement 02 Contd...

- I don't want a boring wish, I need something which is more exciting (like which contains some embedded image).

Problem Statement 03

- I also need a wish…

Problem Statement 03 Contd...

- Ofcourse, the exciting one...

Problem Statement 03 Contd...

- But with gift as proper email attachment.

Future Aspects

Thank You!!
